Designed for tough, winter works

NO DETOURS.™

Bandag M852

Trailer Winter - On/Off

Superb grip in snow and ice for better performance and security.

Excellent stability to ensure safety and efficiency.

High resistance against irregular wear and cuts for outstanding on/off capabilities.

Premium winter retread solutions by Bandag

Winter conditions are a challenge for any vehicle and when you have a trailer behind you, the challenge is even greater. You need strong grip to handle your load on such wet, snowy or even icy surfaces.

The extreme challenges posed by winter conditions are the reason Bandag created the M852 tread. Technology has advanced to a point where we are able to specially engineer the tread to ensure efficiency and safety in even the most extreme winter conditions. It fulfils all technical requirements when it comes to safety, but has also proven to be an exceedingly efficient, cut resistant and long-lasting tread, making it an excellent choice for on/off applications.

Featuring Bridgestone technologies

The Bandag M852 tread is based on the well-known Bridgestone M852 tyre, incorporating similar technologies:

- The *Tie Bars* between the tread blocks in the shoulder area increase circumferential stiffness. The increased stiffness minimises heel and toe wear which leads to longer service life and less need to turn the tyres.
- *Dual Sipes* improve wet/winter performance and reduce stone retention.

The Bandag M852 is the perfect tread to extend the life of the Bridgestone M852 new tyre.
